

**CENOVUS ENERGY**

Cenovus Energy is a leading integrated oil company headquartered in Calgary, Alberta. Our operations include our growing enhanced oil projects and established natural gas and crude oil production in Alberta and Saskatchewan. We also have ownership interest in two high-quality refineries in Illinois and Texas.

The people at Cenovus are respectful of the environment and communities where we work and committed to applying fresh, progressive thinking to the development of the energy resources the world needs.

Our expansive bitumen reservoirs, along with our considerable natural gas and crude oil production and cost-efficient refineries, offer significant opportunities for us to deliver long-term shareholder value.

The different areas where we operate challenge us to identify the unique needs of the environment and our impact on it. We take our responsibility for safe water use and disposal, managing air emissions and limiting our physical footprint and impact on natural diversity, including wildlife, very seriously. Working with our stakeholders, we explore the needs of our operating areas. And, using innovative technology, we continually look for ways to mitigate our impact on the environment.
