

Enterprise Saskatchewan

Enterprise Saskatchewan is a bold and innovative approach to creating sustainable economic growth in Saskatchewan. Originating from the Ministry of Enterprise and Innovation, it is a special agency for coordinating the province's growth agenda, led by key economic development and community stakeholders with one ultimate goal: to ensure Saskatchewan has a competitive environment that will attract investment at every level.

Enterprise Saskatchewan is led by a board of external strategic economic advisors from industry and other stakeholder partners, working through sector teams and strategic issues councils. The board recommends actions and strategies to enhance competitiveness and economic growth in Saskatchewan.

In cooperation with other partners, Enterprise Saskatchewan also directs strategic marketing and investment attraction activities to present a unified and consistent message to investors and business interests, both in Saskatchewan and abroad.
