

## Ministry of Economic Development, Innovation and Export Trade

Québec's economy is defined by the province's diverse sectors of activity, creative entrepreneurs and workforce, and openness to the world.

The main drivers of economic growth in Québec are:

- Innovation - we're always searching for better ways of doing things in all fields in order to maximize performance and achieve even better results.
- Exports - the spearhead of Québec's economy, exports convey our know-how abroad and ensure the continued success of our companies.

The ministry therefore seeks to support economic development, innovation and export trade, as well as research, particularly by encouraging coordinated and concerted action among the various players in the economic, scientific, social and cultural areas in order to promote job creation, economic prosperity, scientific development and sustainable development.
