

Greening Greater Toronto

Greening Greater Toronto is an initiative of the Toronto City Summit Alliance, a coalition of civic leaders who develop and launch solutions to pressing social and economic challenges in the Toronto region. More than 170 partners from corporations, industry, government, and the non-profit sector have joined the Greening Greater Toronto initiative, which aims to make the Greater Toronto Area the greenest city region in North America. Greening Greater Toronto is engaged in four initial programs to address the region's environmental challenges, including: driving adoption of energy efficiency measures in Toronto region commercial buildings; creating a local emissions reduction fund; developing a green procurement initiative; and building a network of public education/demonstration centres.
